

Trouble-free broadband activation **IN ONE CLICK**

Meet the FIP-200 Connector Checker™

Purpose-built for activating broadband services. A handy, entry-level tool that is easy to carry and easy to use, the FIP-200 allows any technician to check connectors in one click.

Super easy to use

Affix it to a connector, press the button, get the result. No setting or configuration required.

Purpose-built

Pass/fail thresholds adapted to FTTH activation, featuring a 5-bar rating to avoid unnecessary connector handling.

Easy to carry

Sleek shape for technicians on the move and comes with EXFO's proven field ruggedness.

THE NEW
